

Why is it important to have Full Spectrum Hemp?

Over 113 cannabinoids* so far discovered, plus terpenes (gives plant its scent), flavonoids & other compounds work synergistically to create “the entourage effect of Hemp”.

* CBD therefore is only 1/113th of what the hemp plant has to offer us.

Broadway Hemp Company: We grow it. We process it. We bottle it. Nothing artificial.

Why Broadway Hemp?

NC Grown
and
processed

Our hemp is grown without the use of pesticides, insecticides, herbicides or other harmful chemicals. Grown to organic standards.

Full Spectrum live resin (hemp flower trichomes = Kief) and crude oil extracted only using pure CO₂. Pure and clean of any potentially toxic or heavy metal residues that can be left behind in other chemical extraction methods

Tinctures – blended with MCT oil (medium chain triglycerides) and natural flavoring.

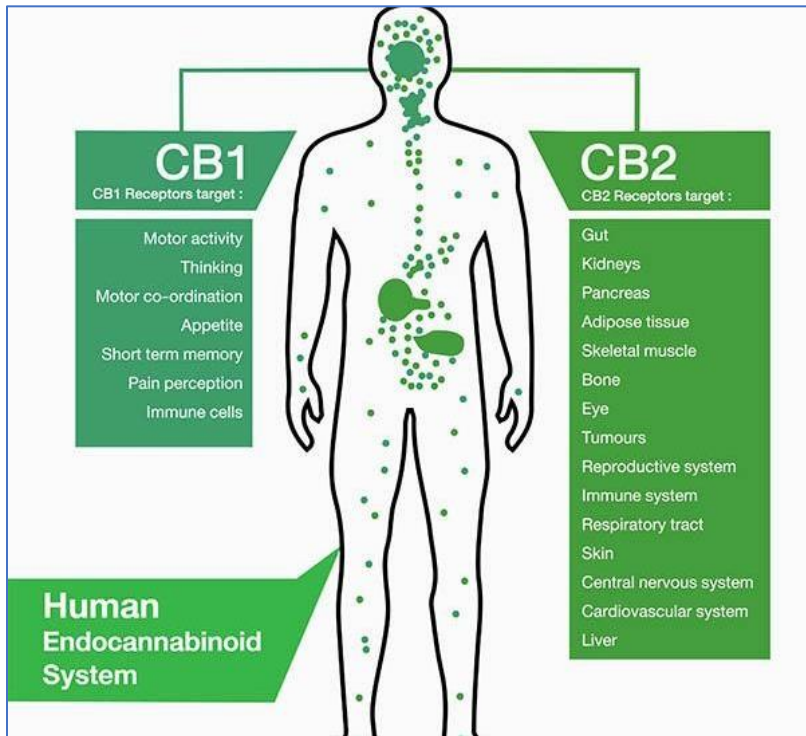

Our products contain no fillers, no artificial colors, flavors nor preservatives.

Each crop and product verified third party lab tested to ensure safety, purity and accurate cannabinoid profiles. Certificates of Analysis on our website. *

* Hemp regulations only require crop is tested for THC content (less than .3%). Most companies just do that. We do extensive testing on crop and products – we hide nothing, so our customers know exactly what they are getting.

Hemp and the Endocannabinoid System (ECS)

All mammals have an ECS responsible for regulating and balancing many processes in the body to achieve homeostasis – including Immune response, communication between cells, appetite, metabolism, memory, pain, inflammation, mood. Cannabinoids dissolve in fat and cross the blood-brain barrier.

CB1 receptors mostly in brain and central nervous system;

CB2 receptors in peripheral organs, especially immune system cells. ⁵

Medicinal Properties of Cannabinoids, Terpenes & Flavonoids in Hemp *

Combats Pain and Chronic Pain Syndrome – migraine, headache, improvement in quality of life ¹

Anti-inflammatory – combats inflammatory disorders (inflammation linked to most major diseases) ⁴

Anticonvulsant – suppresses seizure activity, epilepsy ²

Antioxidant – combats free radical damage and oxidative injury ⁴

Anxiety Disorders / Anxiolytic / Anti-depressant / Antipsychotic agent – combats anxiety and psychosis disorders, seasonal affective disorder, panic disorder, PTSD, schizophrenia ^{2,4}

Combating opioid epidemic – assists in opioid detoxification and weaning ¹

Anti-emetic – inhibits chemotherapy-induced nausea/vomiting ^{4,3}

Immune system and gastrointestinal health - hemp used as nutraceuticals; Cannabinoids block cellular entry of SARS-CoV-2 ^{5,7}

Neuroprotectant – protects nervous system from injury/damage ⁶
